

Environmental and sustainability policy

Introduction

produces a wide range of reinforcement products to meet today's customer demands in the marketplace. This document is the company's policy rules governing environmental protection.

The Company acknowledges that steel is the material of choice for environmental protection. It is environmentally friendly, it out-performs other materials as it is readily recyclable.

These policy rules are applicable to all employees, visitors, contractors and agency workers working for the company. Environmental protection is promoted by the following principles:

Commitment through accreditation

The Company has accreditation to BS EN ISO 14001: 2015 Environmental Management Systems and uses this Standard for all matters relevant to the company's commitment to environmental protection.

The Company ensures compliance with all relevant environmental laws, regulations and any other company commitments.

Environmental improvement

The Company continually seeks improvement in its environmental performance, this includes systematic monitoring, aiming at pollution prevention, development, improvement and the application of low impact environmental production methods.

Recycling and efficiency

The Company develops and manufactures environmentally friendly products focusing on their use and subsequent recycling. This is achieved through efficient use of natural resources, energy and land.

Reduction of CO²

Where technically and economically feasible, the management and reduction of the footprint for steel reinforcement production is paramount.

The Company has employee commitment with responsibility to its environmental performance. This includes ensuring that its suppliers and contractors are made aware of the Company's commitment and that they respect the company's environment policy.

For those who may be affected by its operations, the company acknowledges that open communication and dialogue with stakeholders is necessary.

The success of this policy requires the involvement and commitment of everyone working for and with us.
